## **FairfieldNodal Wins First ZXPLR™ Survey**

**SUGAR LAND, TX, 25 September 2017** –FairfieldNodal will launch its inaugural ZXPLR survey in the Gulf of Mexico, October 2017, ushering in a new era of operational excellence for the company.

FairfieldNodal's ZXPLR data acquisition system is the next evolution in its Z Technology portfolio, with significant improvements in productivity. The revolutionary new system will provide a safer and more efficient acquisition experience for customers, delivering the same repeatable, high-quality seismic data and overall lower total cost of ownership. This will enable operators to make better decisions and allow them to unlock the exploration and development potential of their investments.

"We are recognized as a market leader in seismic data acquisition, a position built on an established track record, the proven performance of our Z Technology and acquisition services," says Charles (Chuck) Davison, President and CEO, FairfieldNodal. "We are continuing to make significant investments in new products and service offerings and are always looking for ways to improve and differentiate ourselves in the marketplace."

This project is scheduled to last two months.
